

9 out of 10 networks have potentially serious IT cyber threats sitting undetected & unaddressed.

Which will your network audit look like?

← OR →

We'll show you.

Category	What We Uncover
Hardware:	<ul style="list-style-type: none"> ✓ Servers, Workstations, Printers, and non-AD devices (like switches/routers/printers) ✓ Old computers which are still joined to the domain and have not been removed
Software:	<ul style="list-style-type: none"> ✓ Systems with missing Patches/Service Packs/Security Updates ✓ Local accounts (per-system) with weak/insecure passwords ✓ Systems with missing Anti-Virus, Anti-Spyware, or firewall misconfiguration
Configuration:	<ul style="list-style-type: none"> ✓ Security policy inconsistency across network servers/computers ✓ Outbound system access that should be blocked ✓ Lack of Content filtering (Social Media, Entertainment, Pornography, Illegal Downloads)
Accessibility:	<ul style="list-style-type: none"> ✓ Misconfiguration of user access to Network Shares ✓ Detailed breakdown of AD Security Group Membership
Security Risks	<ul style="list-style-type: none"> ✓ Old user accounts which still have access and have not been properly disabled ✓ Internal systems with open ports that pose a potential security risk ✓ External issues which put your network at risk of business disruption or data loss

SATISFACTION GUARANTEED: Our Network & Security Audit reports run over 600 pages. Don't worry, we sit down and review the summary & plan of corrective action with you. If you aren't satisfied with the results, we'll refund 100% of your money. You have nothing to lose with our Money Back Guarantee for whatever reason.
