

Anti-Phishing

If your firm has NEVER had simulated phishing emails or very limited training, we'll test your employees **FREE** so you can see if and WHERE your cyber risks currently stand. The exam will take less than an hour and you'll have a better handle on what you haven't measured until now.

Employees clicking on phishing emails is the primary way hackers get access to your company. Test it for FREE.

Review it for yourself. No hype, no spam. I guarantee this training costs less per person, per month than the coffee your holding as you read this. Contact us to learn the details of my guarantee.

5 Ways Technology Can Take You To The Next Level

It's nearly impossible to run a business in today's climate without using up-to-date technology. This doesn't necessarily mean bringing in the best computers, printers and other pieces of hardware needed to run a successful business. Instead, it means you should utilize the most current software and programs to ensure nothing falls through the cracks.

If you're just starting your own business, or even if you've been in business for years, it can be difficult to figure out what programs and websites will help you stay ahead of the pack. One of the biggest concerns that has plagued businesses lately is productivity. It can be difficult to ensure your employees are staying productive, especially if your business is operating remotely right now. Luckily, many apps and websites out there are designed to boost productivity in the workplace.

It can be difficult to figure out which apps and websites will work best for your business, so we have created a list of the five best apps and websites that boost employee productivity.

TimeCamp

TimeCamp, an incredibly useful productivity app, is able to track how much time your team is spending on any given project. It will provide a breakdown, showing specific apps and websites, so you can see where most of their time was spent. You'll also get analytics so you can determine how they are performing. TimeCamp will even assist with keeping your budget in check to ensure that no task or project goes over budget.

If clocking time has been an issue in your business, TimeCamp can help there too. This program can be used as an easy attendance-tracking tool, as it has functions for clocking in and

Continued from pg.1

out, tracking overtime, automating payroll and reporting leaves. It's simple to use and comes with endless benefits.

Digital Assistants

While it would be nice for every employee to have an assistant, it's just not financially feasible. With the influx of technology over the last decade, nearly every person who works in your company has access to a digital assistant at all times. Siri, Cortana, Alexa and Google Assistant all exist to help you and your employees get through the day.

If you have employees who continually miss meetings or deadlines, have them set up reminders with their digital assistant. It can be as easy as saying, "Remind me that I have a meeting in three hours," and your digital assistant will remind you when it's time.

Slack

If your company operates remotely, or if you have certain employees who aren't working in the office, how are you communicating with each other? Using e-mail can become tedious, and e-mails are frequently missed. Texting is also not the best option unless you supply everyone in your company with a mobile work phone. That's where Slack comes in.

Slack is a group-messaging system designed to increase productivity. This program will keep employees up-to-date on recent developments within the company. You can also create specific groups if you need to get a message out to a specific team or group of people. Slack has been a lifesaver for many companies during the pandemic.

Asana

Asana is one of the best project management tools on the market. With this program, you'll be able to plan projects way in advance and plot out what should be completed first. There are also messaging options for every task and project so you can keep your team informed of any developments or changes. If you're overseeing a team that is working on the same project, then Asana is a must-have for your company.

Microsoft 365

There are few things more frustrating than scheduling a meeting only to find out that you overbooked or the person you were supposed to meet with was double-booked. With Microsoft 365, you'll never run into this problem again. The calendar-sharing feature on Microsoft 365 allows you to see everyone's schedule so you can plan out meetings when everyone is free. You'll also have improved communication, secure cloud storage and automatic upgrades with Microsoft 365.

If you plan to grow your business until it's considered elite, you must make the necessary technological adjustments. If you're unsure about where to start, give these apps and websites a view. They could really bolster your productivity.

"If you plan to grow your business until it's considered elite, you must make the necessary technological adjustments."

Do You Safeguard Your Company's Data And Your Customers' Private Information BETTER THAN Equifax, Yahoo and Target Did?

If the answer is "NO" - and let's be honest, the answer is no - you are leaving yourself and your company open to massive liability, *millions* in fines and lost business, lawsuits, theft and so much more.

Why? Because you are a hacker's #1 target. They know you have access to financials, employee records, company data and all that juicy customer information - social security numbers, credit card numbers, birth dates, home addresses, e-mails, etc.

Don't kid yourself. Cybercriminals and hackers will stop at NOTHING to steal your credentials. And once they have your password(s), it's only a matter of time before they destroy your business, scare away your customers and ruin your professional and personal life.

Why Not Take 4 Seconds Now To Protect Yourself, Protect Your Company And Protect Your Customers?

Our 100% FREE and 100% confidential, exclusive CEO Dark Web Scan is your first line of defense. To receive your report in just 24 hours, visit the link below and provide us with your name and company e-mail address. Hopefully it will be ALL CLEAR and you can breathe easy. If your company, your profits and your customers are AT RISK, we'll simply dig a little deeper to make sure you're protected.

Don't let this happen to you, your employees and your customers. *Reserve your exclusive CEO Dark Web Scan now!*

Cyber Security TIPS

Why a Really Good Backup Should NOT Be Your Only Protection From Ransomware.

I recommend you read an article I found that perfectly describes why companies shouldn't rely on perfectly good backups to protect them against ransomware attacks.

Here's the pull quote:

"Restoring encrypted files might seem like the most important thing to do when faced with a ransomware attack. Unfortunately, recovering from backup might just mean recovering systems to a point where the attacker already had access. It doesn't fix the vulnerabilities that led to the breach. Resolving a ransomware attack isn't just a matter of the files any more than resolving a flooded basement is just a matter of pumping out the water. You also need to fix the leaky pipes." - SC Magazine

But actually read the entire article.

I've shrunken the link to usable size: <http://bit.ly/backupanacea>

One of the most critical aspects of a malware attack is the search to ensure all the doors are locked & the criminal isn't still in the house.

About half of the businesses successfully attacked by ransomware are out of business in the next 6 months. Don't lose your business assuming you're protected. — R²

Remote Work Is No Joke

Not long ago, I read an article in The New York Times titled *We're Kidding Ourselves That Workers Perform Well From Home*, which I felt urgently needed a counterpoint. The article discussed the Houston-based law firm Ahmad, Zavitsanos, Anaipakos, Alavi & Mensing as they navigated the pandemic, avoided layoffs and achieved their best year on record. It's an inspiring story, and I don't mean to take any credit away from it.

That being said, the heart of the story is that Zavitsanos attributed the success of his business to when his colleagues returned to the office during the pandemic. He stated that "ambitious lawyers at firms like ours simply couldn't thrive in a virtual setting." That's true for your firm, but I fear your case might scare off leaders who are considering a more flexible work arrangement for their workforces.

I want you to consider the alternative experience that my company, ghSMART, saw when we offered flexible and remote work before and during the pandemic; we produced similar results! At ghSMART, every employee has worked from home since day one, and we have never doubted that ambitious professionals can function with remote and flexible work.

At ghSMART, we achieved record revenue and profits throughout the pandemic, completing a 10-year average annual revenue

growth of 21% and profit growth of 24%. Client-satisfaction metrics reached all-time highs. Our clients are board members and CEOs of some of the largest companies in the world, as well as government leaders and private equity investors of the largest funds.

If you think a remote firm can't build a successful culture, you'd be wrong. ghSMART recently won an award for being the best management consulting firm to work for. This was out of 100,000 firms and was based on overall employee satisfaction. We also hold a Glassdoor culture rating of 4.9 out of 5, which is #1 in our industry.

You'd also be mistaken if you thought a remote firm would struggle to attract top-tier talent. We have four New York Times best-selling authors and two Rhodes Scholars — and many of our colleagues have performed at the top of their peer groups. It's clear that you can attract and retain top talent at a remote firm.

For the leaders of those organizations who are considering flexible and remote work, I say give it a chance. It offers a level of freedom and flexibility your employees will be incredibly grateful for, and you may even see an uptick in productivity.

Dr. Geoff Smart is the chairman and founder of ghSMART, a leadership consulting firm that exists to help leaders amplify their positive impact on the world. Dr. Smart and his firm have published multiple New York Times best-sellers. He stays active in his community and has advised many government officials.

5 Ways To Keep Your Business Eco-Friendly

For years, “going green” has been a huge trend for businesses. And 2022 will continue this trend, so it’s important for entrepreneurs to consider the effect their businesses have on the environment. We’ve gathered five ways you can make your business environmentally sound.

Account And Offset Your Carbon.

If you don’t know the carbon footprint of your business, you should take some time to figure it out. Once you know, you’ll need to make a consistent effort to offset it.

Don’t Use Paper.

Most things you do in your business can be completed digitally now. Stop using paper for basic situations and let your computer do the work instead.

Allow Employees To Work Remotely.

When your employees have to commute, emissions from their vehicles are harmful to air quality. If

your employees can responsibly work from home, let them.

Perform An Audit.

It might be difficult to tell which practices are harmful to the environment, but it can help to perform an audit so you can pinpoint any waste management and consumption issues.

Incentivize Environmentally Friendly Practices.

Give your employees even more of a reason to be environmentally conscious. Encourage and reward them for their efforts.

3 Security Practices That Businesses Are Adopting In 2022

Cyber security, a huge focus for small businesses, may cause feelings of risk and confusion about how to protect data, employees, clients and a reputation. If you’re worried about cyber security in your business, implement one of these safety practices:

Adopt A Zero-Trust Framework.

Many IT security programs will

require steps to access the system, but you’ll have access to everything once you’re in. That means one small breach and a cybercriminal will have full access. A zero-trust framework will close any gaps, keeping your information protected.

Utilize 2-Factor Authentication.

An experienced cybercriminal can get through password gates with ease, so you’ll need to create additional roadblocks. Two-factor authentication will add an extra layer of security that most hackers can’t break through.

Train Your Staff.

Your employees must know the basics when it comes to cyber security. Make sure they are trained - even incorporate training into your new-hire orientation so you can create a cyber-secure culture.

Protect Your Company’s Future By Following Samsung’s Methods

In this day and age, if you stand still in the world of business, you’ll get left behind. Samsung is doing everything in their power to ensure they’re around for a long time. In fact, Samsung’s CEO, Jong-Hee Han, recently explained three methods they are using to keep their customers happy for years to come. While Samsung is known for developing new technology and devices, their methods can be applied to any product. If you want to ensure customers will continue to purchase your products in the distant future, give these methods a try:

- ..# Make sure your products are easy to use.
- ..# Create sustainable products.
- ..# Ensure your products are energy-efficient.
